

Please allow my XM radio to continue broadcasting the Instant Traffic and Weather. I am counting on them to help me in my city very soon but if you follow the NAB petition 04-160, you will prevent me from getting a service that I CHOOSE to subscribe.

Instead of the local broadcasters doing a better job, they'd rather fight than improve their "quality of service". That is Un-american or is it? They'd rather use the government to protect them rather than invest in what the people want? Maybe that IS American! I hope not!

The U.S. is SO FAR BEHIND the rest of the world with respect to radio services and this fight with the NAB is another reason for broadcasters' lack of innovation. Let XM Radio Prevail! I'm paying for the service, I expect freedom without interference (pun intended!)
